Education

Swami Keshvanand Institute of Technology, Management & Gramothan (SKIT) <i>B.Tech in Computer Science and Engineering (GPA: 8.74/10)</i>	2021 – 2025 Jaipur, Rajasthan
Gyandeep Vidya Mandir <i>Higher Secondary Education (Score: 8.4/10)</i>	2020 – 2021 Raipur, Chhattisgarh

Experience

DEVTOWN (Web Development) <i>Full Stack Development Intern</i>	Jun 2024 – Aug 2024 Jaipur, Rajasthan
- Built a fully functional E-commerce website using Node.js, React.js, and MongoDB, handling over 20+ product categories and simulating 100+ user interactions. - Implemented 10+ RESTful APIs for core functionalities like product listings, user login, and cart management. - Optimized backend logic and resolved API response issues, resulting in a 15% improvement in website performance and faster data retrieval.	
GIM INFO SOLUTIONS (YCombinator) (Fintech & SaaS Products: GimBooks) <i>Software Developer</i>	July 2025 – Present Jaipur, Rajasthan
- Developing and maintaining backend systems for GimBooks and Pixera using Python (Django), improving API reliability and reducing error rates by 30%. - Engineered and deployed CI/CD pipelines in Bitbucket, reducing manual deployment time by 80% and enabling seamless multi-environment releases. - Executed disaster recovery strategy during a critical AWS regional outage, restoring 95%+ production data and reducing service downtime by 60% through rapid backup validation and failover handling. - Containerized core microservices using Docker and orchestrated deployments with Kubernetes, achieving 50% faster scaling during high-traffic periods. - Built and optimized multiple RESTful APIs for invoicing, payments, authentication, and reports, improving response time by 25-40%.	

Projects

- 1. Medical Appointment System** | *React.js, Node.js, Express.js, MongoDB, Razorpay*
 - Built a full-stack medical appointment platform using the **MERN stack**, handling **50+ daily bookings**.
 - Developed **REST APIs** for doctor availability, patient scheduling, and time-slot management.
 - Optimized backend queries, improving API performance by **25%**.
 - Live Project Link
- 2. Music Player** | *React, Express.js, Supabase, Redux Toolkit, TypeScript, AWS S3*
 - Built a music player inspired by Spotify supporting **100+ tracks**.
 - Integrated **Supabase** and **AWS S3** for scalable data and file storage.
 - Used **Redux Toolkit** and **TypeScript** for efficient and type-safe state management.
 - Live Project Link
- 3. AI Fitness App** | *React, Django, DRF, Razorpay, PostgreSQL*
 - Built a full-stack AI-powered fitness platform with **React frontend** and **Django REST backend**, handling **50K+ users**.
 - Designed scalable APIs for workout planning and user management, improving response efficiency by **35%**.
 - Integrated **Razorpay** payment gateway for secure transactions, achieving **96.9% payment success rate**.
 - Optimized performance with caching and efficient DB queries, reducing load time by **40%**.
 - Live Project Link

Technical Skills

Languages: Python, JavaScript, C++, Java
Web Development: Django, DRF, Node.js, Express.js, React.js, Next.js, Tailwind CSS
DevOps & Cloud: Docker, Kubernetes, GitHub Actions, Bitbucket Pipelines, AWS (S3, EC2), CI/CD
Databases: MongoDB, PostgreSQL, MySQL
Tools: Git, GitHub, Bitbucket, Postman, VS Code
Core CS Concepts: DSA, OOP, OS, CN, DBMS
